2nd Free Workshop for Teachers of English in Bulgaria

In the EdYOUfest Series: *Approach and Method*

Workshop n. 17: *New Perspectives on Communicative Correction*

Does error correction work? Some people think not, but then again, many people use techniques which are unilateral and based on the presupposition that if you correct students, they learn. If that is the case, why do students make the same errors over and over again?

This workshop will dismantle some common ideas about correction and offer some innovative procedures designed to save time and increase efficiency.

Expect to get involved!
